

Baker County Health Department - Health Services - Disease Control

A communicable disease may be spread directly or indirectly from person to person. This agency is always contacted when conditions point to such diseases. Each case is investigated.

This agency offers confidential HIV testing and counseling for at risk persons.

The Health Department can examine, diagnose, and treat people for STDs. Early diagnosis and treatment are the best ways to decrease complications and in most cases obtain a complete cure. STD exams are made by appointment during the week.

Please see the website for all services.
